

Thank you for purchasing FX-I240

The integrated 4K DisplayPort fiber optic cable is designed to let 4K@60Hz UltraHD DisplayPort signals extend over 40 meters away from host, based on DisplayPort 1.2 standard by optical transmission technology.

Package Contents

Please make sure all of the following items are included in the package:

1. FX-I240 cable – 4K DisplayPort fiber optic cable
2. User Guide

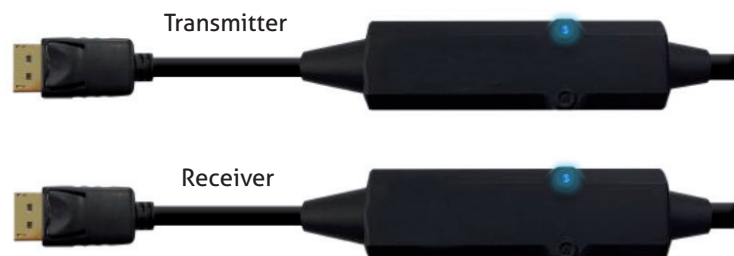

If any of the above items are missing, please contact your supplier for support.

Note: Package content may differ if you have placed a special order or placed order from anywhere other than PureLink GmbH. PureLink GmbH reserves the right to make changes without further notice to a product described herein to improve reliability, design, packaging or function.

Installation

Installation Steps:

1. Connect the FX-I240 transmitter(TX) to DisplayPort source device.
2. Connect the FX-I240 Receiver(RX) to Display device.
3. Blue LED indicator on the TX and RX modules will be light up after all connections are completed.

* Be careful not to connect TX and RX cable to the opposite direction. Use DP to Mini DP or HDMI/DVI adapter to connect FX-I240 is not guaranteed.

Application

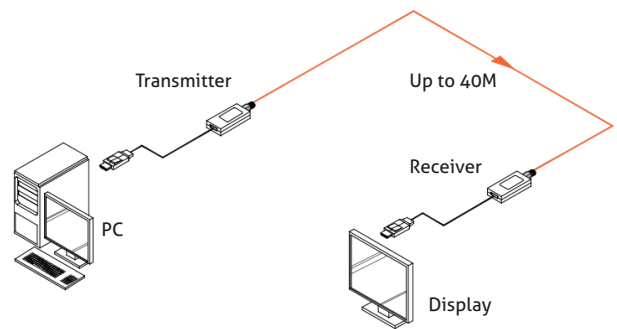

Trouble shooting

FX-I240 cable may not be compatible with some of graphic cards. Please follow the troubleshooting steps below.

Please check that blue LED light of both TX and RX module are on.

- If both LED lights or one side of LED light was off,
 - 1) Please re-connect TX and RX connector of FX-I240.
- If there is no display when both TX and RX side of LED light are on,
 - 1) Please reconnect TX connector of FX-I240.
 - 2) Please reboot monitor.

Please contact manufacturer if problem are still not fixed after troubleshooting.
