

Statement of PureLink GmbH

on the REACH Directive Chemicals Regulation
with Regard to the Products Manufactured or Distributed by PureLink

PureLink
digital solutions

Dear Customers,

Given at Rheine, March 2018

As a global company, we only market products that comply with applicable law. As a matter of course that we are always in conformity with all currently valid national, European or international regulations and laws in all business matters.

The EU chemicals regulation REACH prescribes information requirements for the case that products contain certain SVHC substances (Substances of Very High Concern) in concentrations higher than 0.1% by weight.

According to the REACH regulation, we have an information obligation. If we have concrete information on exceeding these limits for a product, we will inform you in accordance with the REACH requirements. **However, this does not prohibit the sale of PureLink products or distribution products.**

PVC cables typically contain i. a. the following materials:

- PVPVC Softeners, e.g. DEHP, CAS No. 117-81-7
- Alkanes /SCCP (Short Chain Chlorinated Paraffins, Softener, Flame Retardants), CAS No. 85535-84-8
- Phtalates (Softeners), e.g. CAS No. 84-69-5

According to Article 3 of REACH Regulation (EC) 1907/2006, PureLink is neither manufacturer, nor importer of these substances and does not put such substances on the market. We solely import finished products to the EU. From practice we know that the raw material quality of different production batches may vary due to production process. Therefore, we are careful to point out that PVC cables may contain SVHC substances in concentrations higher than 0.1%.

This notice also applies for cables permanently connected to equipment, as well as cables supplied with equipment, provided they are PVC cables. Non-PVC cables, halogen-free cables, PU / PE cables, as well as packagings, thus are not affected.

For us, Product Quality includes social and sustainable production from verifiable and legally compliant sources. Therefore, we are in communication with our suppliers also on behalf of advancement of these products.

With our PureLink Products and distribution brands, we meet our responsibility towards our customers, every day.
