# PureLink™, Company Profile

## Divisions of PureLink

Founded as a specialist for digital cable connections, the company has been steadily developing over the past few years. Success as well as our customers' satisfaction confirm us in our efforts to think outside the box, to keep developing and sometimes even invent.

By now, our main business area is made up of five divisions. In each of them, there are qualified and specialized staff members at your service. As a customer of PureLink, you benefit from this development, from the above-average expertise and the shortest communication paths.

### Consumer

An important area of business are PureLink Consumer products. In answer to the increase in demand of our customers to not only develop products for professional use, we have created a complete range of products for end-users. The focus of this product line is the combination of modern consumer electronics. The Consumer products impress with their quality, their excellent price / performance ratio and their state-of-the-art design.

For example, our ProSpeed series was nominated for the German Design Award, the highest award a product can receive for its design in Germany.

### Commercial

PureLink Commercial products have been our main business since the company was founded. Through to the absolute focus on innovative quality products, we have become one of the leading suppliers in the professional field. The products are mainly used for professional installations and media technology. Our cables in this area are branded PureLink. In order to better distinguish the electronics from the retail products, electronic products are sold under the brand name PureTools. Quality and high performance - even under difficult or demanding conditions - are what characterize the PureLink Commercial products.

### ProAV

The flagship of the company is the 2009 newly created Professional range. Especially in recent years, this area has developed more and more.

In the Professional field, we support our customers from the planning and conceptual design to the installation of high-tech projects. The most recent references include for example the complete equipment of the world's largest computer manufacturer's European headquarters or the complete network of mega yachts with a length of 100m+. Several of the world's largest and most expensive yachts are equipped with our systems. Also in the military and control area, we have conducted and supervised prestige projects according to special requirements and conditions.

Our professional products are sold under the brand name PureLink PRO and are personally supervised exclusively by highly qualified staff members.

### Distribution

Products from other companies can also inspire us. When we see that other companies offer innovative products of excellent quality, we value this. Why invest in the development of a similar product, if we cannot improve it? We are only satisfied with the best. This is why we contract partnerships with other manufacturers when we realize that they have particular expertise in their specialty. Hence, a separate distribution area has been created, which exclusively sells selected products from other manufacturers – having its own service team, of course.

### OEM

Individual requirements need custom products. As an original equipment manufacturer, we can develop products according to specific requirements. From individual projects over the years, a whole division was created. Whether cable for retailers, special cables for medical or custom digital signage solutions, many customers rely on our expertise and give your ideas and requirements into our hands. By developing specifications on the design and the design, production, to complete retail concepts. Our contacts in the OEM sector will help with projects of any size.

PureInstall

PureLink's new "Secure Lock System" was especially developed for an optimized and secure use of HDMI connections.

The HDMI connector's innovative and well-engineered construction is one-of-a-kind on the European market.

These and other innovative product highlights can be found in our new PureLink Commercial catalogue and on our new website

## Modular Multiformat Cross-Platform, HDBaseT and Fiber Matrix Router

PRO-PM-16X

PureLink™ is proud to introduce its latest breakthrough in matrix routing technologies, the new PM Series is a stunning achievement, a tour d'force of the most edge-of-the-art features ever combined in one chassis:

### Features

- ▶ 3G/HD-SDI, CAT.X (HDBaseT), DVI, Fiber, HDMI Interchangeable Switching
- ▶ Independent Control of Video and Audio
- ▶ Auto-EDID (Capture and Storage, Selectable Presets)
- ▶ HDCP-Compliant
- ▶ HDMI 1.4
- ▶ Audio Matrix Switching (Balanced or Un-Balanced), using 5-pin Phoenix\*
- ▶ Audio Attenuation, Output Only
- ▶ POE+ (All Outputs Simultaneously) for Stand-Alone PM Tx or Rx Modules
- ▶ RS-232+
- ▶ Inputs directly compatible with PM Extender Transmitters
- ▶ Outputs directly compatible with PM Extender Receivers
- ▶ Selectable PCM Audio Breakout
- ▶ Selectable Audio Insertion/Extraction
- ▶ LCD Touch-Screen Display w/ Security Lock-out
- ▶ Input/Output Signal Analysis (Resolution, EDID, HDCP)
- ▶ Bi-Directional RS-232 +422/LAN Control
- ▶ Input Image Monitoring Port (HDMI)
- ▶ Built-in Test Pattern Generator
- ▶ Auto-Scaling / Seamless Switching
- ▶ GenLock for 3G/HD-SDI
- ▶ Dual Redundant Power

NOTE: All HDMI 1.4 Specifications includes full 3D support, Audio Return Channel, 48-Bit Deep Color, and 7.1 Channel Dolby TruHD & DTS MasterHD

\*PM-80X has 16x16 built-In Audio Matrix. Audio Matrix configuration shall be customizable up to 80x80

\*\*PM-128X has 16x16 built-In Audio Matrix. Audio Matrix configuration shall be customizable up to 128x128

\*\*\*PM-256X has 32x32 built-In Audio Matrix. Audio Matrix configuration shall be customizable up to 256x256

<sup>1</sup>PM-16X has built-in 300W (150Wx2) power module. 300W (2 x PM-16X-PSU) additional power shall be required, in case POEs are used.

This power add-on can be installed in factory only.

<sup>2</sup>PM-32X has built-in 600W (300Wx2) power module. 600W (2 x PM-32X-PSU) additional power shall be required, in case POEs are used.

This power add-on can be installed in factory only.

# PM Series

## Modular Multiformat Cross-Platform Matrix Router Boards

### Flexible Input/Output Switching with Auto Distribution

Each main port on the PM Matrix Router Series DVI, Cat.X, and Fiber I/O boards also contains a parallel HDMI port, effectively doubling those boards' I/O capacity.

On the input side, the user can choose either the main Cat.X /DVI/Fiber port or the parallel HDMI port via the front panel or control command, providing a 2x1 switch within the input and thereby double the amount of inputs.

On the output side, the main DVI, Cat.X, and Fiber port and the parallel HDMI are driven simultaneously, providing a 1x2 distribution amplifier with a mirrored output for each main output.

### Input Boards for PM Matrix Router Series

Model	Type	Inputs	Outputs	Compatibility with Extenders
PRO-PM-HIS4	HDMI Input Board	4x HDMI + 4x Stereo Audio (3.5mm)	4x Stereo Audio (3.5mm)

\* Output boards are not selectable via RS-232/422 or Gui, it's mirrored outputs (DA).

# PM Series

## Extenders - Transmitters

PRO-PM-CT102

### PureLink is proud to announce its new extenders of the PM Series.

The PM Series Cat.X (HDBaseT) extension system is designed to transmit and receive video (DVI, HDMI and VGA), audio (embedded or analog stereo audio), control (RS232/422 and IR), and power over a single Cat.X cable for long distance up to 100m.

The PM Series Fiber Optic extension system is designed to transmit and receive video (DVI, HDMI and VGA), audio (embedded or analog stereo audio), control (RS232/422 and IR) over a pure two strands fiber optic cable for long distance up to 2.000m.

### Features

- ▶ Stand-Alone and Wallplate Type
- ▶ HDMI, DVI, VGA, Cat.X (HDBaseT) and Fiber Optic (2xLC) Formats
- ▶ Utilizing HDBaseT Technology for Cat.X Modules
- ▶ POE+ (real Power over Ethernet)
- ▶ Auto-EDID (Emulation and Selectable)
- ▶ Selectable Audio Break-out via 3.5mm Stereo Jack
- ▶ Auto-Sensing HDMI or VGA controllable
- ▶ RS-232/422 and IR control capable
- ▶ Max. Distance limitation up to 2.000m
- ▶ Compatible with PM Series Matrix Router

## Extenders for RF Extension Center - Transmitters

PRO-PM-RF6

### Finally, PureLink brings order to the chaos of the modular extension category.

Up till now, modular extension modules have all been too small for rack mounting, creating a messy, cluttered jumble of small black boxes in the rack.

Able to mix Fiber Optic and Cat.X (HDBaseT) extensions, the new RF extenders of the PM Series features power supply for up to six modules per chassis, eliminating a lot of small adapter type power supplies, housed in a 1RU rack housing for better performance, reliability and value.

### Features

- ▶ HDMI, DVI, VGA, Cat.X (HDBaseT) and Fiber Optic (2xLC) Formats
- ▶ Utilizing HDBaseT Technology for Cat.X modules
- ▶ POE+ (real Power over Ethernet)
- ▶ Auto-EDID (Emulation and Selectable)
- ▶ Selectable Audio Break-out via 3.5mm stereo jack
- ▶ Auto-Sensing HDMI or VGA controllable
- ▶ RS-232/422 and IR control capable
- ▶ Max. Distance limitation up to 2.000m
- ▶ Compatible with PM Series Matrix Router

## Modular Cross-Platform Matrix Router

PRO-MX-1800

The PureLink™ MX Series was introduced in 2008 as the world's first "modular" cross-platform digital matrix router featuring plug-in boards for HDMI, DVI, and 3G SDI. After five years being deployed all over the world in mission critical applications, the MX Series has never had a failure.

From 80x80 down to 8x4, more choices, better performance, higher reliability, any way you set it up, this is everything to everything routing at its best.

### Features

- ▶ Analog and Digital Audio interchangeable
- ▶ DVI, HDMI, 3G-SDI, Fiber Optic and Cat.X interchangeable
- ▶ HDCP-compliant
- ▶ RS-232 and LAN control
- ▶ Front LCD Touch Panel
- ▶ Flexible EDID Management Function (Emulation, EDID library)
- ▶ Hot swappable
- ▶ Fastest response switching time (under 20ms.)
- ▶ Compatible with external controllers by AMX, Barco, Vista and Crestron
- ▶ Optional built-in Redundant Power Supply
- ▶ Optional Genlock BNC connector for external synchronization
- ▶ Pixel re-clocking & error correction
- ▶ Largest Custom 320x320 (all supporting formats)

### Modular 3G/HD-SDI Digital Matrix Router

PRO-SX-7200

The PRO-SX-7200 is a digital 3G/HD-SDI matrix router designed for use with all 3G, SDI and HD-SDI video signals and conforms to the SMPTE 259M specification. It handles all composite, 143 Mbps and 177 Mbps, component 4:2:2, 270 Mbps, and wide-screen 16:9, 360 Mbps, serial standards. This unit has in- and output capabilities from 12x12 to 72x72, which are capable of routing all digital video signals up to 2.97Gbps. The control of the PRO-SX-7200 from a third party control system can be done via RS-232 or RS-422 or via LCD front touch panel.

This unit is ideal for various broadcast systems, including medical equipment and other image application.

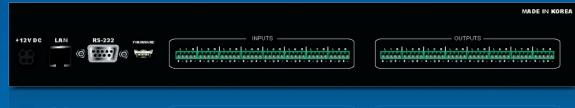

#### Features

- ▶ All SMPTE and ITU standards -SMPTE 259M, ITU-R BT.601, SMPTE 292M,ITU-R BT.1120 SMPTE 372M, and SMPTE 424M standards
- ▶ Maximum Data Rates - 2.97 Gbps
- ▶ Data Rate Compatibility 143 Mbps, 177 Mbps, 270 Mbps, 360 Mbps, 540 Mbps, 1.485 Gbps, 2.970 Gbps
- ▶ Input equalization
- ▶ Output re-clocking
- ▶ Interface Using RS 232, LAN(TCP/IP) CONTROL
- ▶ Dedicated preview and preset easy control via LCD front touch panel

Model	Type	Inputs	Outputs	Compatibility with Chassis
PRO-SX-7200	3G/HD-SDI Matrix Router Chassis	Up to 72x 3G/HD-SDI	Up to 72x 3G/HD-SDI	PRO- SX -SIS12 PRO- SX -SOS12

PRO- SX -SOS12	3G/HD-SDI Output Board		12x 3G/HD-SDI	PRO- SX -SIS12

# AX Series

## Integrated Audio Matrix Router

PRO-AX-8800

The PRO-AX-8800 stereo audio matrix router supports both balanced and unbalanced audio signal. It features volume control function of amplification and attenuation.

PRO-AX-8800 can be controlled via three convenient control methods; front panel button, RS-232C and LAN (TCP/IP).

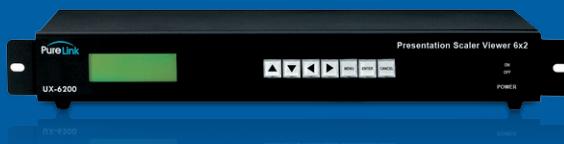

### Features

- ▶ BALANCED/UNBALANCED In- and Outputs
- ▶ Input Signal
  - IMPEDANCE : >10K ohms ,BALANCED/UNBALANCED
  - NOMINAL LEVEL : 0 dB
  - MAX LEVEL : 19.5 dB
- ▶ Output Signal
  - IMPEDANCE : 50 ohms UNBALANCED, 100 ohms BALANCED
  - VOLUME RANGE: +31.5 ~ -95.5 dB
- ▶ RS-232 Controll
- ▶ Ethernet Controll - 10/100Base-T, TCP/IP, TELNET , HTTP
- ▶ 19" Rackmountable, 1 RU

Model	Type	Inputs	Outputs	Compatibility with Chassis
PRO-AX-8800	Audio Matrix Router	8x Balanced/Unbalanced Audio (Phoenix Connectors)	8x Balanced/Unbalanced Audio (Phoenix Connectors)	

# UX Series

## Presentation Scaler Viewer 6x2

PRO-UX-6200S

The PRO-UX-6200 Presentation Scaler 6x2 offers the highest compatibility among HDMI, DVI, VGA, CVBS and SDI to HDMI and DVI / VGA in the market. This unique device supports analog and digital conversion and scaling without loss of quality. With this advanced feature, users can combine asynchronous video and audio sources into the state-of-art HDMI compliant A/V signal for further long range lossless transmission and high standard A/V experience!

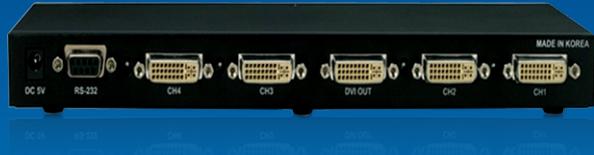

PRO-UX-6200 is designed to ease the conversion among the most common digital video formats to HDMI and DVI/ VGA.

### Features

- ▶ 6 Channel Multi Input Support - HDMI, DVI, VGA ,CVBS ,SDI
- ▶ 2 Channel Digital Output Support - HDMI, DVI and VGA combo Output
- ▶ 2 channel balanced Audio Input
- ▶ Up & Down scaling output
- ▶ HDCP Compliant
- ▶ Automatically accepts SD/HD/3G
- ▶ RS232 / Ethernet(RJ-45) Control Port

Model	Type	Inputs	Outputs
PRO-UX-6200S	Multiformat Presentation Scaler/ Switch	1x HDMI, 1x DVI, 1x VGA, 1x CVBS, 2x SDI (BNC) 1x Balanced Audio (Phoenix) 1x RS-232, 1x RJ45	1x HDMI 1x DVI and VGA combo output 1x Balanced Audio (Phoenix)

## DVI Switchers

PRO-DS-41R

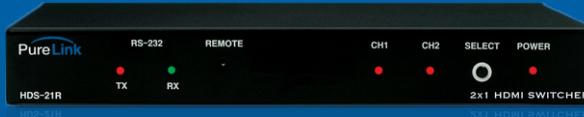

PureLink's DVI Switchers allows multiple HDTV sources to share one HDTV display utilizing the DVI digital to digital connection for superior HD performance. All PureLink™ DVI switching systems are HDCP compliant, come with wireless IR remote control and RS-232 input for home network systems like Crestron, AMX, and others.

### Features

- ▶ DVI 1.1 compliant
- ▶ Supports Resolution WUXGA (1920x1200)
- ▶ HDCP compliant
- ▶ Frontpanel, IR and RS-232 controllable
- ▶ Signal Regeneration allows longer distance connectivity with copper cables
- ▶ Proven Reliability-Rigorous Aging Tests ensure 100,000+ trouble free hours of operation
- ▶ Flexible EDID-Improves compatibility with all HD displays worldwide
- ▶ Robust Construction-Solid Steel chassis, rackmountable (included)

Model	Type	Inputs	Outputs
PRO-DS-21R	DVI Switch	2x DVI	1x DVI
PRO-DS-41R	DVI Switch	4x DVI	1x DVI

## HDMI Switchers

PRO-HDS-21R

PureLink's HDMI switches allow number of digital video sources (with audio) to deliver one high quality picture video display (with audio). Our unique switch allows easy switching between different digital video sources (with audio) with remote control unit and/or with a manual toggle button in front and/or via RS232 port.

### Features

- ▶ Supports Full 1080p With Deep Color Depth
- ▶ Compliant to v1.3c HDMI spec
- ▶ HDCP compliant
- ▶ Frontpanel, IR and RS-232 controllable
- ▶ Supports Multi-Channel Surround Sound via HDMI
- ▶ Signal Regeneration allows longer distance connectivity with copper cables
- ▶ Proven Reliability-Rigorous Aging Tests ensure 100,000+ trouble free hours of operation
- ▶ Flexible EDID-Improves compatibility with all HD displays worldwide
- ▶ Robust Construction-Solid Steel chassis, rackmountable (included)

Model	Type	Inputs	Outputs
PRO-HDS-21R	HDMI Switch	2x HDMI	1x HDMI
PRO-HDS-41R	HDMI Switch	4x HDMI	1x HDMI
PRO-HS510	HDMI Switch	4x HDMI + 1x Mini HDMI	1x HDMI

# DVI Distribution Amplifiers

PRO-DD-2100

PureLink's DVI Distribution Amplifier are designed to distribute DVI inputs (PC, AVR) at full 1080p HD, to HD display monitors with no degradation of the original signal quality or distortion of the image. The compact and durable design makes it an ideal solution for connection of the high definition video and audio content in digital display devices.

## Features

- ▶ DVI 1.1 compliant
- ▶ Supports Resolution WUXGA (1920x1200)
- ▶ Signal Regeneration allows longer distance connectivity with copper cables
- ▶ Proven Reliability-Rigorous Aging Tests ensure 100,000+ trouble free hours of operation
- ▶ Active HDCP on every output for quicker boot-up, reliable sync without crashes
- ▶ Flexible EDID-Improves compatibility with all HD displays worldwide
- ▶ Robust Construction-Solid Steel chassis, rackmountable (included)

Model	Type	Inputs	Outputs
PRO-DD-120	DVI Distribution Amp	1x DVI	2x DVI
PRO-DD-250	DVI Distribution Amp	2x DVI	5x DVI
PRO-DD-2100	DVI Distribution Amp	2x DVI	10x DVI

# HDMI Distribution Amplifiers

PRO-HD-250

PureLink's HDMI Distribution Amplifiers are designed to distribute HDMI inputs (PC, AVR) at full 1080p HD, to HD display monitors with no degradation of the original signal quality or distortion of the image. Quality construction, age-tested parts, and discrete HDCP keys make this design work everytime without failure.

## Features

- ▶ Supports Full 1080p With Deep Color Depth
- ▶ Compliant to v1.3c HDMI spec
- ▶ Supports Multi-Channel Surround Sound via HDMI
- ▶ Signal Regeneration allows longer distance connectivity with copper cables
- ▶ Proven Reliability-Rigorous Aging Tests ensure 100,000+ trouble free hours of operation
- ▶ Active HDCP on every output for quicker boot-up, reliable sync without crashes
- ▶ Flexible EDID-Improves compatibility with all HD displays worldwide
- ▶ Robust Construction-Solid Steel chassis, rackmountable (included)

## RF Series

### RF6 Extension Center - Transmitters for HDMI and DVI Fiber Optic / Cat.X

PRO-RF6

Up till now, modular extension modules have all been too small for rack mounting, creating a messy, cluttered jumble of small black boxes in the rack.

Able to mix Fiber Optic and Cat.X extensions, the RF extender modules features power supply for up to six modules per chassis, eliminating a lot of small adapter type power supplies, housed in a 1RU rack housing for better performance, reliability and value.

#### Features

- ▶ Supports up to 2048×1080 at 60Hz, 1080P at 60Hz
- ▶ Each Frame mounts up to 6 Modules
- ▶ DVI/HDMI Interchangeable
- ▶ Single Power from the Frame for all 6 Modules
- ▶ HDCP compliant
- ▶ Built-in Auto EDID management function
- ▶ 19" Rack Mountable – 1RU
- ▶ Rack Mount Transmitter modules are compatible with Stand Alone Receiver Modules
- ▶ Rack Mount Receiver Modules are compatible with Stand Alone Transmitter Modules
